Sacramento, CA 95814

May 14, 2000

Dear Colleague,

It is our pleasure to present for your consideration the proposal titled "Evaluation of Biological Assimilatory Capacity for Mechanism-Based Adaptive Management for Selenium in the San Francisco Bay-Delta", Dr. Teresa W-M. Fan, lead PI.

With regards to the "Threshold Requirements", the PSP Cover Sheet is found at the beginning of the proposal, while the Environmental Compliance Checklist, Land Use Checklist, and the State and Federal contract forms are attached at the back as per instructions. Please note that there are no letters of notification, since this is a research project that does "not include any physical action on the ground", as stated in the CALFED 2001 PSP, p. 50.

Please also note that in Section H, Compliance with Standard Terms and Conditions, there is a letter addressing the Univ. of California, Davis position on the terms.

Sincerely,

A handwritten signature in black ink, appearing to read "Teresa W-M. Fan".

Teresa W-M. Fan, PI
